

# CatchMe

## `CatchMe` available on Thunderclap and soon on Kickstarter!

The app-enhanced assistant which follows people for you on the road is now available on Thunderclap.

August 24, 2015

Marseille, FRANCE – The team composed of one IT expert and one engineer specialized in new technologies, is excited to announce the launch of its crowd-speaking campaign. “CatchMe” app, the world’s first interactive vehicle tracker app is available on Thunderclap. The campaign is now live and will run through August 31.

Follow the link: <https://www.thunderclap.it/projects/30124>

It already completes **25%** of the objective with a potential impact of **527.000 people!**

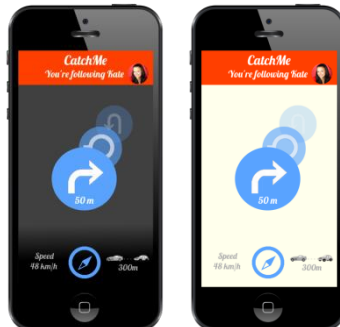

CatchMe is not an ordinary GPS app, it is a true driving assistant designed to strengthen the connection between two vehicles or more.

It is a bridge between vehicles with technologies that allow users to get information from leader vehicle: directions, speed, and distance. While also providing convenient features such as notifications, conference call, backup trip and more. All features enhance safety during journeys while keeping your eyes on the road.

The main feature is the assistant which allows you to know the route to be followed to catch up the leader.

As a messenger, CatchMe create a micro-notifications to serve as a warning of

We plan to release CatchMe on February, French on Android Market and in App be free, subsequently users will be able to version (0.9 €).

social group during a trip including danger.

2016. It will be available in English and Store as a second step. The main app will access to more options on the premium
